

SpiderCapo Tunings Compendium

There are **63** possible tunings at each fret of the guitar. Each fret offers new, unique tuning possibilities. Calculating up to the 15th fret that equals **945** possible tunings without touching a tuning peg!

-Very much room for individual selection, taste, sound, and identity.

The tunings are shown from the lowest, bass, 6th string "E" ,
to the highest, treble, 1st string "E". Like this:

[6th,5th,4th,3rd,2nd,1st]. Example: [000400] is SpiderCapo at 4th fret
and only 3rd string, G, is depressed.

So, the number corresponds to the fret at which the SpiderCapo is applied.

Here are some selections in use by individuals. We want to add yours!

Please drop an email to : spidercapo@gmail.com!

[111011] for playing in Eb

[001100] **Peter**, E major 7, "Just Like a Woman"
